A lighter is a portable device used to create a flame, and to ignite a variety of combustible materials, such as cigars, gas stoves, fireworks, candles or cigarettes. It consists of a metal or plastic container filled with a flammable fluid or pressurized liquid gas, a means of ignition to produce the flame, and some provision for extinguishing the flame.

### **Lighter - Wikipedia**

A lighter is a type of flat-bottomed barge used to transfer goods and passengers to and from moored ships. Lighters were traditionally unpowered and were moved and steered using long oars called "sweeps" and the motive power of water currents. They were operated by highly skilled workers called lightermen and were a characteristic sight in London's docks until about the 1960s, when ...

Decatur takes the old and makes it new. The design of the Decatur Pipe Lighter may look familiar, but it's not what you think. Even though it appears to be a liquid fuel lighter, it's actually a side-firing, soft-flame butane pipe lighter, and it doesn't use the Z-Plus' original sparkwheel ignition.

#### **Decatur Pipe Lighter - Pipes and Cigars**

Today I found out that lighters were invented before the match.. This one had me scratching my head for a bit. There are several sites out there that say the match came first. However, by definition of the "match", they are incorrect.
