If you google my name, spelled in the unconventional way that I spell it, the first search results won't have anything to do with me. They'll reference another Dan Colman who, in the past year, has made a good chunk of change playing poker -- including winning \$15.3 million in one tournament alone. He apparently did it all without availing himself of MIT's course -- Poker Theory and Analytics ...

Game theory is the study of mathematical models of strategic interaction between rational decision-makers. It has applications in all fields of social science, as well as in logic and computer science. Originally, it addressed zero-sum games, in which one person's gains result in losses for the other participants. Today, game theory applies to a wide range of behavioral relations, and is now an ...

I for one think this is a great change, and a brilliant post. Absolutely, less time delightedly exploring still more abstruse mistake-theory-legible problems (although these are fun and the theory that total unity is possible feels good) in favor of more time spent on projects such as, “which candidates are really fighting for the people vs. just astroturfed shills” ... hear hear!
