A race is a grouping of humans based on shared physical or social qualities into categories generally viewed as distinct by society. First used to refer to speakers of a common language and then to denote national affiliations, by the 17th century the term race began to refer to physical (phenotypical) traits. Modern scholarship regards race as a social construct, an identity which is assigned ...

Race (human categorization) - Wikipedia

14.1.1 Relative frequency. The word probability is used in everyday language. Answering questions about probability is often hard, if not impossible. Here we discuss a mathematical definition of probability that does permit us to give precise answers to certain questions.. For example, if I have 2 red beads and 3 blue beads inside an urn (most probability books use this archaic term, so we do ...

How does the moon influence life on Earth? - ResearchGate

The Random Walk Hypothesis. Many systems in the real world demonstrate the properties of randomness including, for example, the spread of epidemics such as Ebola, the behaviour of cosmic radiation, the movement of particles suspended in liquid, luck at the roulette table, and supposedly even the movement of financial markets as per the random walk hypothesis ... but before we get into the ...
