Community Reviews. The expedition is framed as a study of the artificial, broadly defined as anything created by humans-- a class into which business firms, machines, computer programs and human experience are all masterfully corralled-- but extends well beyond those bounds into the natural as well.

The Sciences of the Artificial (1969) is a book by Herbert A. Simon. Sciences of the Artificial: A Retro-Review by Timothy Koschmann, The Journal of the Learning Sciences, Vol. 12, No. 3 (2003), pp. 409–411. This article about a 1960s novel is a stub. You can help Wikipedia by expanding it. See guidelines for writing about novels.

### **The Sciences of the Artificial - Wikipedia**

The Sciences of the Artificial. When an artificial system adapts successfully, its behavior shows mostly the shape of the outer environment and reveals little of the structure or mechanisms of the inner. The inner environment becomes significant for behavior only when a system reaches the limits of its rationality and adaptability, and contingency degenerates into necessity.

### **The Sciences of the Artificial - Herbert Alexander Simon ...**

Dawson Notes on The Sciences of the Artificial 2 Simon draws a distinction between the artificial and the synthetic, but notes that both synthesis and artifice belong to the realm of engineering. "The engineer is concerned with how things ought to be -- ought to be, that is, in order to attain goals, and to function. Hence, a science of the ...

### **Dawson Notes on The Sciences of the Artificial**

Herbert A. Simon. He received the Nobel Prize in Economics in 1978 and the Turing Award in 1975. His research was noted for its interdisciplinary nature and spanned across the fields of cognitive science, computer science, public administration, management, and political science. He was at Carnegie Mellon University for most of his career, from 1949 to 2001.
