The Sibley Guide To Trees

→ Last Updated on April 8, 2015. The Sibley Guides series began with the publication of The Sibley Guide to Birds in 2000, and since then has expanded to include four additional books on birds and, in 2009, The Sibley Guide to Trees. This website presents some of my ongoing efforts to identify and understand the birds and trees of North America.

The Wood Duck is one of the most stunningly pretty of all waterfowl. Males are iridescent chestnut and green, with ornate patterns on nearly every feather; the elegant females have a distinctive profile and delicate white pattern around the eye. These birds live in wooded swamps, where they nest in holes in trees or in nest boxes put up around lake margins.

An intense bundle of energy at your feeder, Red-breasted Nuthatches are tiny, active birds of north woods and western mountains. These long-billed, short-tailed songbirds travel through tree canopies with chickadees, kinglets, and woodpeckers but stick to tree trunks and branches, where they search bark furrows for hidden insects. Their excitable yank-yank calls sound like tiny tin horns being ...

This species and the Downy Woodpecker are remarkably similar in pattern, differing mainly in size and bill shape. They often occur together, but the Hairy, a larger bird, requires larger trees; it is usually less common, especially in the east, and less likely to show up in suburbs and city parks. In its feeding it does more pounding and excavating in trees than most smaller woodpeckers ...

Most common in the Midwest and South is this small oriole. It favors open areas with scattered groves of trees, so human activities may have helped it in some areas, opening up the eastern woodlands and planting groves of trees on the prairies. Orchard Orioles often gather in flocks during migration. The black-throated young male, sitting alone in a treetop and singing his jumbled song, is ...
