Title Quantitative Analysis For Management

Quantitative analysis is the use of models, or algorithms, to model risks in general, or to evaluate assets for investment. The process usually consists of searching vast databases for patterns, such as correlations among liquid assets or price-movement patterns (trend following or mean reversion). The resulting strategies may involve high-frequency trading.

Many of us experience "analysis paralysis" when we're faced with a difficult decision. Often, we're afraid of making the "wrong" choice, so we spend a huge amount of time analyzing every possibility, and struggling to reach a conclusion. At other times, however, we are convinced that we already know ...
