Your eye constantly makes aqueous humor.As new aqueous flows into your eye, the same amount should drain out. The fluid drains out through an area called the drainage angle.This process keeps pressure in the eye (called intraocular pressure or IOP) stable. But if the drainage angle is not working properly, fluid builds up.

The film follows an animated American peanut, who sings about the difficulties faced by nuts from developing countries. Supported by a mixture of animation, music, our American peanut takes the viewer through the stories of the cashew, brazil and ground nuts — all of whom suffer as world trade is liberalized. But it is a different story in America — where the peanut is protected by tariffs ...
