The Hormone Solution

Peptide hormones or protein hormones are hormones whose molecules are peptides or proteins, respectively. The latter have longer amino acid chain lengths than the former. These hormones have an effect on the endocrine system of animals, including humans. Most hormones can be classified as either amino acid-based hormones (amine, peptide, or protein) or steroid hormones.

Peptide hormone - Wikipedia

Auxins (plural of auxin / ' ɔ: k s i n /) are a class of plant hormones (or plant growth regulators) with some morphogen-like characteristics. Auxins have a cardinal role in coordination of many growth and behavioral processes in the plant's life cycle and are essential for plant body development.

Auxin - Wikipedia

There are numerous benefits of human growth hormone, HGH, in the extension of the human span of optimal health. Modern medicine has been studying the pros and cons of HGH for a number of years and debating who is an appropriate candidate for growth hormone replacement. This section of the Life Extension Manual discusses these benefits and legal issues.
