In the 17th century a Flemish physician, chemist, and physicist named Jan Baptista van Helmont performed a 5 year study in which he massed the soil of a willow tree in a pot and after 5 years found that the willow had gained a tremendous amount of mass and soil had lost very little. Van Helmont believed that water was the source of the plant mass.

Growth & Development Plant Mass

Xylem is made from vessels, which are continuous tubes from dead, hollow, cylindrical cells lined up end to end throughout the plant. There may also be tracheids, which are dead cells that are ...
