In philosophy, panpsychism is the view that mind or a mind-like aspect is a fundamental and ubiquitous feature of reality. It has taken on a wide variety of forms. Contemporary academic proponents hold that sentience or subjective experience is ubiquitous, while distancing these qualities from complex human mental attributes; they ascribe a primitive form of mentality to entities at the ...

The stages From the Big Bang to Integral I found simple symbolic scenes to express each level so that when we look at them we can get an immediate 'feel' of each stage in their respective quadrants. For instance, amber upper left is someone bathed in the shining light of an almighty god; orange upper right is a marathon runner reaching for high performance; lower right green is a new city ...
