Researchers found Mueller's claim preposterous in light of the U.S. Constitution in which We the People bestow all powers to the government. No grand jury can operate alongside or outside of We the People in our Republic. To read such a claim from a man who was director of the FBI for more than a decade implies that everything he built at the FBI is a house built on shifting sand.

On December 9th, 1968, a research project funded by the US Department of Defense launched a revolution. The focus was not a Cold War adversary or even a resource rich banana republic, but rather to "augment human intellect" and the man driving it was not a general, but a mild mannered engineer named Douglas Engelbart. His presentation that day, which would be so consequential that it is now ...
