Data warehouses (DW) are centralized data repositories that integrate data from various transactional, legacy, or external systems, applications, and sources. The data warehouse provides an environment separate from the operational systems and is completely designed for decision-support, analytical-reporting, ad-hoc queries, and data mining.

Benefits of a Data Warehouse - BI / DW Insider

Customer Communications Management (CCM) is a software to enable companies to manage customer communications across a wide range of media including printed documents, email, web pages and text messages. It entails an automated process that involves not only the delivery of communication but also the segmentation of messages according to different customer profiles and contexts.

Customer communications management - Wikipedia

Whichever industry you work in, or whatever your interests, you will almost certainly have come across a story about how "data" is changing the face of our world. It might be helping to cure a disease, boost a company's revenue, make a building more efficient or be responsible for those targeted ads you keep seeing. In general, data is simply another word for information.

What is data, and why is it important? | Import.io

An acid is a molecule or ion capable of donating a hydron (proton or hydrogen ion H^+), or, alternatively, capable of forming a covalent bond with an electron pair (a Lewis acid).. The first category of acids is the proton donors or Brønsted acids. In the special case of aqueous solutions, proton donors form the hydronium ion H_3O^+ and are known as Arrhenius acids.

Acid - Wikipedia
