This Mother's Day, expand your notion of "mother." In this real-life model of forest resilience and regeneration, Professor Suzanne Simard shows that all trees in a forest ecosystem are interconnected, with the largest, oldest, "mother trees" serving as hubs. The underground exchange of nutrients increases the survival of younger trees linked into the network of old trees.

The Lake District South of Chile's Biobio River begins a land where earth and water play liberally together, producing visions of startling natural beauty. Known as the Lake District, it is a region where azure, mirrored lakes hold the reflections of ice-capped volcanoes, ancient trees and, of course, the indomitable Andes.
