Musica universalis (literally universal music), also called Music of the spheres or Harmony of the Spheres, is an ancient philosophical concept that regards proportions in the movements of celestial bodies—the Sun, Moon, and planets—as a form of musica (the Medieval Latin term for music). This "music" is not usually thought to be literally audible, but a harmonic, mathematical or religious ...

### **Musica universalis - Wikipedia**

In ancient Greece, Pythagoras and his followers thought that celestial bodies made music. This diagram attempts to represent such theories about the earth's relationship to other planets—an idea, based in physical truths and metaphysical beliefs, that the divine and poetic order of the universe could be known.

p. 81. The Pythagorean Theory of Music and Color. HARMONY is a state recognized by great philosophers as the immediate prerequisite of beauty. A compound is termed beautiful only when its parts are in harmonious combination. The world is called beautiful and its Creator is designated the Good because good performance must act in conformity with its own nature; and good acting according to its own ...
