The Strain Volume 1 David

Deformation in continuum mechanics is the transformation of a body from a reference configuration to a current configuration. A configuration is a set containing the positions of all particles of the body. A deformation may be caused by external loads, body forces (such as gravity or electromagnetic forces), or changes in temperature, moisture content, or chemical reactions, etc.

Deformation (mechanics) - Wikipedia

Strain theory. Strain theory is a sociology and criminology theory developed in 1938 by Robert K. Merton. The theory states that society puts pressure on individuals to achieve socially accepted goals (such as the American dream), though they lack the means.

Strain theory (sociology) - Wikipedia

C57BL/6J is the most widely used inbred strain and the first to have its genome sequenced. Although this strain is refractory to many tumors, it is a permissive background for maximal expression of most mutations. C57BL/6J mice are resistant to audiogenic seizures, have a relatively low bone density, and develop age related hearing loss. They are also susceptible to diet-induced obesity, type ...
