Postmedia Solutions

They use sensored brushless DC motors. They use controllers that decide which coil to power by which sensor detects a magnet. When going faster than it's supposed to, the lookup table for which part is supposed to be powered (whether to brake or accelerate) isn't accurate, which can lead to some bad shit.

Scooters hacked to play rude messages to riders : news

I've been meaning to create this post for quite sometime because I knew it would be helpful to have a page dedicated to the subject of EIG hosting for visitors to reference: including their background, what hosting brands they own, noteworthy outages, and trends of reliability/support. I have included some of my own opinion, however I feel that if you read through this whole post, follow the ...
