Place / Milan – Italy Year / 2014 – 2017 Type / Cultural multifunctional facilities Status / Built. Laboratorio Permanente completed the renovation of an early XX century Milanese building. These spaces are conceived as a flexible sequence of rooms, different in geometry, natural or artificial light, materials and colours, to accomodate several different cultural activities.

LABORATORIO — PERMANENTE

1.Describe the phases of clinical trials? Ans:- These are the following four phases of the clinical trials: Phase 1: Test a new drug or treatment to a small group of people (20-80) to evaluate its safety. Phase 2: The experimental drug or treatment is given to a large group of people (100-300) to see that the drug is effective or not for that treatment.

When re-appointing patients, prospectively identify pre-visit lab tests for the next visit. For example, at the end of an office visit, schedule a patient with diabetes to return in three months to complete a fasting blood sugar and HgBA1c before the visit so the result is available to the patient and physician at the following appointment.
