It's best to apply polyurethane to flat (as in level) surfaces so the finish can self-level and is less likely to drip. When applying polyurethane on vertical surfaces, you may experience drips or runs. Minimize this problem by applying thinner coats or by switching from standard brush-on poly to a wipe-on or spray finish, both of which can be applied in very thin coats.

Tips for Applying Polyurethane for a Perfect Finish

Learn the basics of hand-tool woodworking in this two-part project video where we guide you through building a small elegant box. Download our free article for a complete measured drawing with construction details and dimensions, and then follow along with our video tutorial..
