The first commercial product that I worked on after going on leave of absence from Apple in March 1984 (see Leave Of Absence) was a low cost, high resolution scanner for the Macintosh called Thunderscan, that I created in collaboration with a tiny company named Thunderware (see Thunderscan). I started working on it in June 1984, and by early October, it was almost complete.

Even though Bruce Daniels was the manager of the Lisa software team, he was very supportive of the Mac project. He had written the mouse-based text editor that we were using on the Lisa to write all of our code, and he even transferred to the Mac team as a mere programmer for a short while in the fall of 1981, before deciding that he preferred managing for Lisa.

Macintosh, anche abbreviato Mac, è una popolare famiglia di computer prodotti dalla Apple Inc. commercializzati a partire dal 1984 e facenti uso del sistema operativo macOS. Deve il suo nome a una popolare varietà di mela ("apple" in inglese), la McIntosh. La scelta del nome è stata attribuita a Jef Raskin, l'esperto di interfacce di computer che ne sviluppò il progetto.

Macintosh. New Zealander Ken Macintosh made his TZ frames around the mid to late seventies. As far as we know just 6 or so were ever made. Quote from Alistair Wilton's Macintosh TZ350F article in this website: The general layout, geometry etc was that of the original F model, but with some subtle and not so subtle differences. The theory, which also worked well in practice, was that you could ...
