Item 18: Reduce Visual Noise with Variable Positional Arguments. Accepting optional positional arguments (often called star args in reference to the conventional name for the parameter, *args) can make a function call more clear and remove visual noise.. For example, say you want to log some debug information.

Image Composition in IM Image Composition is the process of merging two (and only two) images in a variety of ways. It is associated with Alpha Composition which describes the result based on which part of the overlay is transparent. Image Composition is used for blending and averaging images, transferring image channels, cutting, joining, or layering odd shaped segments of images.

The nothing to hide argument states that government surveillance programs do not threaten privacy unless they uncover illegal activities, and that if they do uncover illegal activities, the person committing these activities does not have the right to keep them private.. A person who favors this argument may state "I've got nothing to hide" and therefore does not express opposition to ...

Nothing to hide argument - Wikipedia

Tip: If you want to divide numeric values, you should use the "/" operator as there isn't a DIVIDE function in Excel. For example, to divide 5 by 2, you would type =5/2 into a cell, which returns 2.5. The QUOTIENT function for these same numbers =QUOTIENT(5,2) returns 2, since QUOTIENT doesn't return a remainder. For other ways to divide numbers, see Multiply and divide numbers.

A small radius limits any effect of the blur to pixels that are within that many pixels of the one being blurred (a square radius). As such using a very small radius such as '1' effectively limited the blurring to within the immediate neighbours of each pixel.. Note that while sigma is a floating point, radius is not. If a floating point value is given (or internally calculated) it is rounded ...
