Exam Test Banks and Solution Manuals

Most materials are very nearly homogeneous, therefore we can usually write $k = k(T)$. Similar definitions are associated with thermal conductivities in the y- and z-directions (k_y , k_z), but for an isotropic material the thermal conductivity is independent of the direction of transfer, $k_x = k_y = k_z = k$.

Thermal Conductivity of Materials and Chemical Elements

In a real gas turbine, mechanical energy is changed irreversibly (due to internal friction and turbulence) into pressure and thermal energy when the gas is compressed (in either a centrifugal or axial compressor). Heat is added in the combustion chamber and the specific volume of the gas increases, accompanied by a slight loss in pressure. During expansion through the stator and rotor passages ...
