Gender is the range of characteristics pertaining to, and differentiating between, masculinity and femininity. Depending on the context, these characteristics may include biological sex (i.e., the state of being male, female, or an intersex variation), sex-based social structures (i.e., gender roles), or gender identity. Many if not most societies use a gender binary, having two genders, men ...

Whole brain synchronization occurs when the various parts of your brain begin to work together, resonating at the same frequencies and causing neural pathways to fire more rapidly. This is also sometimes referred to as “whole brain functioning” or “hemispheric synchronization”. The left and right sides of your brain begin to work in concert with each other.
