Chapter 11 - Properties of Solutions

In chemistry, a solution is a special type of homogeneous mixture composed of two or more substances. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent. The mixing process of a solution happens at a scale where the effects of chemical polarity are involved, resulting in interactions that are specific to solvation.

Mathematicians long wondered whether it's possible to express the number 33 as the sum of three cubes — that is, whether the equation $33 = x^3 + y^3 + z^3$ has a solution. They knew that 29 could be written as $3^3 + 1^3 + 1^3$, for instance, whereas 32 is not expressible as the sum of three integers each raised to the third power.

Sum-of-Three-Cubes Problem Solved for 'Stubborn' Number 33

A SPECIFIC PROPOSAL. Nanofactories as Infrastructure The Internet was originally created by a governmental agency. 28 As it grew, it was supported by funding and technology from many sources, including Guardian (government), Commercial (corporate web sites and private users paying ISPs), and Information (hobbyist programmers, responsible among other things for creating the Internet Protocol).

Nanotechnology: Three Systems of Action

1 Introduction. Emoji are pictographs (pictorial symbols) that are typically presented in a colorful cartoon form and used inline in text. They represent things such as faces, weather, vehicles and buildings, food and drink, animals and plants, or icons that represent emotions, feelings, or activities.

UTS #51: Unicode Emoji

As animals develop, tissue bending contributes to shape the organs into complex three-dimensional structures. However, the architecture and packing of curved epithelia remains largely unknown.

Scutoids are a geometrical solution to three-dimensional ...

A spray nozzle is a precision device that facilitates dispersion of liquid into a spray. Nozzles are used for three purposes: to distribute a liquid over an area, to increase liquid surface area, and create impact force on a solid surface. A wide variety of spray nozzle applications use a number of spray characteristics to describe the spray.. Spray nozzles can be categorized based on the ...

dissolved in water. Sucrose is a nonelectrolyte, which means that the solution contains whole C₁₂H₂₂O₁₁ molecules. In predicting the expected freezing point of a solution, one must consider not only the number of formula units present, but also the number of ions that result from each formula unit, in the case of ionic compounds.
