The Blind Watchmaker Why Evidence

The Blind Watchmaker: Why the Evidence of Evolution Reveals a Universe without Design is a 1986 book by Richard Dawkins, in which the author presents an explanation of, and argument for, the theory of evolution by means of natural selection. He also presents arguments to refute certain criticisms made on his first book, The Selfish Gene. (Both books espouse the gene-centric view of evolution.)

The watchmaker analogy or watchmaker argument is a teleological argument which states, by way of an analogy, that a design implies a designer. The analogy has played a prominent role in natural theology and the "argument from design," where it was used to support arguments for the existence of God and for the intelligent design of the universe, in both Christianity and Deism.

The Scientific Evidence for Creation - Summit Ministries

The method by which science discovers and advances today (the scientific method) has as one of its prerequisites the idea of repeatability. That is, in order to know scientifically (as that word is commonly used) the origin of the universe, and in fact, of anything in the universe, one must be able to REPEAT the event exactly so as to reproduce the first result.

In some circles, however, opposition to the concept of evolution has persisted to the present. In his 1986 book "The Blind Watchmaker" Richard Dawkins recalls expressing his position that he couldn't imagine being an atheist before Darwin. As it happens, there WERE atheists before Darwin, and theories of evolution go back to ancient Greece. It's curious, because he also believes God is in itself a bad explanation (would it still be if evolution were false?).
