We just hit you with a slab of observations about CSS Grid in a new post by Manuel Matuzović. Grid has been blowing our minds since it was formally introduced and Jen Simmons is connecting it (among other new features) to what she sees as a larger phenomenon in the evolution of layouts in web design.

New CSS Features Are Enhancing Everything You Know About ...

Syntax. CSS has a simple syntax and uses a number of English keywords to specify the names of various style properties.. A style sheet consists of a list of rules. Each rule or rule-set consists of one or more selectors, and a declaration block.. Selector. In CSS, selectors declare which part of the markup a style applies to by matching tags and attributes in the markup itself.

A web style sheet is a form of separation of presentation and content for web design in which the markup (i.e., HTML or XHTML) of a webpage contains the page's semantic content and structure, but does not define its visual layout (style). Instead, the style is defined in an external style sheet file using a style sheet language such as CSS or XSLT. This design approach is identified as a ...

Word Wrap Wrap the given text to a given number of characters using a string break character. Use \n for newline character and \t for tab character.

Word Wrap | Online Web Tools

Building the foundation (pages 32-59) The goal is to make money.Profit, ROI, and cash flow measure this. Efficiencies, good people, high tech solutions, selling quality products, capturing market share, etc.—these merely enable a company to make money, but should never be confused with The Goal.. Net profit and a solid ROI is not enough to stay in business.
