Philosophy (from Greek φιλοσοφία, philosophia, literally "love of wisdom") is the study of general and fundamental questions about existence, knowledge, values, reason, mind, and language. Such questions are often posed as problems to be studied or resolved. The term was probably coined by Pythagoras (c. 570 – 495 BCE). Philosophical methods include questioning, critical discussion ...

Philosophy is the systematic study of the foundations of human knowledge with an emphasis on the conditions of its validity and finding answers to ultimate questions. While every other science aims at investigating a specific area of knowledge, such as physics or psychology, philosophy has been defined as "thinking about thinking." At the same time, as expressed by its Greek etymology ...

1. Introduction 1.1 Ayn Rand and Philosophy. In Rand's own words, her first and greatest love, her "life purpose", was "the creation of the kind of world ... that represents human perfection", while her interest in philosophical knowledge was "only" for the sake of this purpose (Journal entry for 4 May 1946; in 1997: 479). [] Nevertheless, her interest in philosophical knowledge ...

Immanuel Kant (1724-1804) Kant's most original contribution to philosophy is his "Copernican Revolution," that, as he puts it, it is the representation that makes the object possible rather than the object that makes the representation possible [§14, A92/B124, note]. This introduced the human mind as an active originator of experience rather than just a passive recipient of perception.
