Brain implants, often referred to as neural implants, are technological devices that connect directly to a biological subject's brain – usually placed on the surface of the brain, or attached to the brain's cortex. A common purpose of modern brain implants and the focus of much current research is establishing a biomedical prosthesis circumventing areas in the brain that have become ...

Brain implant - Wikipedia

My recent trip to Ethiopia allowed me to work with over 80 young girls who exhibited an infectious energy and passion to learn. Their daily struggles were beyond what most of us can comprehend, yet their joy for playing the game of basketball seemed to transcend them from the hardships of their reality to a place where small seeds of hope could grow.
