A first-person point of view reveals the story through a participant narrator. First person creates a close relationship between the narrator and reader, by referring to the viewpoint character with "I" or "we," if the narrator is part of a larger group. That is, the narrator openly acknowledges their own existence.

Narration - Wikipedia

You may wonder why there are so many different psychology perspectives and whether one approach is correct and others wrong. Most psychologists would agree that no one perspective is correct, although in the past, in the early days of psychology, the behaviorist would have said their perspective was the only truly scientific one.
