Although honey seems like a wholesome and natural food to give your infant, don't do it until after she's at least 12 months old. Honey can contain spores of a bacterium called *Clostridium botulinum*, which can germinate in a baby's immature digestive system and cause infant botulism, a rare but potentially fatal illness.. These spores are usually harmless to adults and children over 1 year old ...

When can my baby eat honey? | BabyCenter

Michael Holick, a renowned scientist turned expert witness, relies on his own controversial theory to help alleged abusers avoid prison and regain custody of the babies they were accused of harming.
