10 Gamblers Who Beat The Casino^10 Gamblers Who Beat The Casino^Everyone who walks through the doors of a casino is in an optimistic state of mind. The promise that they can walk out a winner is exhilarating and they convince themselves that they can do so. However, most gamblers walk out losers since every game is mathematically designed with a house edge.

The gambler's fallacy can be illustrated by considering the repeated toss of a fair coin. The outcomes in different tosses are statistically independent and the probability of getting heads on a single toss is  $1/2$  (one in two). The probability of getting two heads in two tosses is  $1/4$  (one in four) and the probability of getting three heads in three tosses is  $1/8$  (one in eight).

Question: "Will there literally be streets of gold in heaven?" Answer: Heaven's streets of gold are often referenced in song and poetry, but harder to find in the Bible. In fact, there is only one passage of Scripture that references streets of gold and that is in the Holy City, the New Jerusalem: "The great street of the city was of gold, as pure as transparent glass" (Revelation 21:21).
