Note: Students should focus on the fact that systems work together not necessarily on the names of each organ. Assessment. The main point of this lesson is to understand that there are different systems within the human body and that these systems work independently and together to form a functioning human body.

Systems of the Human Body - Science NetLinks

In the 1980s, Mayo Clinic researchers measured digestion time in 21 healthy people. Total transit time, from eating to elimination in stool, averaged 53 hours (although that figure is a little overstated, because the markers used by the researchers passed more slowly through the stomach than actual food).

Digestion: How long does it take? - Mayo Clinic
