If an economy is growing, it is easy to add debt. The additional growth in future years provides money both to pay back the debt and to cover the additional interest. Promotions are common and layoffs are few, so a debt such as a mortgage can easily be repaid. The situation is fairly different if...

Productivity is one of the key determinants of potential output—that is, the trend level of production consistent with stable inflation. A productivity growth slowdown has occurred in several advanced economies in the aftermath of the global financial crisis, raising concerns about long-term growth. In response, a variety of supply-side policy options have been proposed, such as reforms to ...
