I have been running fast this week in preparation for the annual family Labor Day Weekend at the lake. There were bed linens to wash, beds to be made, the refrigerator cleaned, floors moped and an extra table added to the porch so that we can seat fourteen. I have been doing prep work in the kitchen; things that can be done ahead of time like making glazed pecans for salads, blueberry muffins ...

Deep-sea fish are fish that live in the darkness below the sunlit surface waters, that is below the epipelagic or photic zone of the sea. The lanternfish is, by far, the most common deep-sea fish. Other deep sea fishes include the flashlight fish, cookiecutter shark, bristlemouths, anglerfish, viperfish, and some species of eelpout.. Only about 2% of known marine species inhabit the pelagic ...

To definitively demonstrate that a pheromone exists, one must design a repeatable experiment, a bioassay, that shows that a smell molecule (odorant) causes a particular effect on the receiver, for example inducing a behavior. Butenandt used such a bioassay to enable his identification of the first pheromone in the silk moth: He observed that males showed excited wing fluttering in response to ...

Camouflage is the use of any combination of materials, coloration, or illumination for concealment, either by making animals or objects hard to see (), or by disguising them as something else (). Examples include the leopard's spotted coat, the battledress of a modern soldier, and the leaf-mimic katydid's wings. A third approach, motion dazzle, confuses the observer with a conspicuous pattern ...
