Game theory is the study of mathematical models of strategic interaction between rational decision-makers. It has applications in all fields of social science, as well as in logic and computer science. Originally, it addressed zero-sum games, in which one person's gains result in losses for the other participants. Today, game theory applies to a wide range of behavioral relations, and is now an ...

Human-based computation (HBC), human-assisted computation, ubiquitous human computing or distributed thinking (by analogy to distributed computing) is a computer science technique in which a machine performs its function by outsourcing certain steps to humans, usually as microwork. This approach uses differences in abilities and alternative costs between humans and computer agents to achieve ...

Low-pass filters are by far the most common filter type, earning wide popularity in removing alias signals and for other aspects of data acquisition and signal conversion. For a low-pass filter, the pass-band extends from DC (0 Hz) to f_c and the stop-band lies above f_c . In a high-pass filter, the pass-band lies above f_c , while the stop-band resides below that point.

Corporations, US presidential candidate Mitt Romney reminds us, are people. Whether or not you agree with the conclusions that his partisans draw from that claim, the statement certainly carries a large amount of truth. What is a corporation, after all, but a certain group of people working together ...

Controlled Flight into Terrain is the aviation industry's term for what happens when a properly functioning airplane plows into the ground because the pilots are distracted or disoriented. What a nightmare. Even worse, in my estimation, is Automated Flight into Terrain, when an aircraft's control system forces it into a fatal nose dive despite the frantic efforts of the crew to save it.
