NIPS remains the most predictive of screening tests, when used as a second-tier screen. As a result, more and more women are choosing to rely on the NIPS result: if it is screen-positive, to prepare for the likelihood of having a child with a condition and if negative to avoid the risk of miscarriage of diagnostic testing, though understanding there's a chance of a false negative.

Salads have so much potential -- though that's not always a good thing. Topped with fresh vegetables, lean proteins, healthy fats, and homemade dressing, they can make the perfect nutrient-packed meal. But when words like "creamy," "bacon," and "cheese" are involved, their real potential is for packing on pounds.
