Photographic processing or development is the chemical means by which photographic film or paper is treated after photographic exposure to produce a negative or positive image. Photographic processing transforms the latent image into a visible image, makes this permanent and renders it insensitive to light.. All processes based upon the gelatin-silver process are similar, regardless of the film ...

I would like to change the colour of the label box - not just the text within the label. How would i do this? `label.BackColor = Color.Coral;` (for instance) will change the colour of the text within the label.. rather than the background colour of the entire label box. Also, if it matters, i'm using a `toolStripContainer` and `ToolStrip`.
