One aspect of finding the right approach for a new treatment is choosing the best technology platform. Molecules used as active substances can be divided into two classes – small and large molecules. They differ not only in terms of size, but also in how they are made, how they behave, their mode of action in the body and their suitability for certain drug forms.

Pharmaceuticals | Bayer - Small and large molecules

"Are small cars safe?" "Are heavy older cars safer than light new ones?" "If a small car gets a good crash test score, does that mean it will hold its own in a crash with a bigger car?"

Are Small Cars Safe? | Edmunds

The most accurate measurement of the size of a human penis can be derived from several readings at different times since there is natural minor variability in size depending upon arousal level, time of day, room temperature, frequency of sexual activity, and reliability of measurement. When compared to other primates, including large examples such as the gorilla, the human penis is thickest ...
