Clinical neuropsychologist Dr. Glen Johnson's Traumatic Brain Injury Survival Guide was written to explain head injuries in clear, easy to understand language for patients of head injuries. The goal of this online book is to better prepare the head injured person and family for the long road of recovery ahead.

Traumatic Brain Injuries: Memory

Memory is the faculty of the brain by which information is encoded, stored, and retrieved when needed.. Memory is vital to experiences, it is the retention of information over time for the purpose of influencing future action. If we could not remember past events, we could not learn or develop language, relationships, or personal identity.. Often memory is understood as an informational ...

Random-access memory (RAM / r æ m /) is a form of computer data storage that stores data and machine code currently being used. A random-access memory device allows data items to be read or written in almost the same amount of time irrespective of the physical location of data inside the memory. In contrast, with other direct-access data storage media such as hard disks, CD-RWs, DVD-RWs and ...

Can Muscle Memory Help You Build New Muscle Faster? Part of the reason people new to weightlifting build muscle so quickly ("newbie gains") is their bodies are highly highly sensitive to

muscle damage. Specifically, during the first six to twelve months of lifting, satellite cells are easily activated after workouts, resulting in large infusions of myonuclei into muscle cells.
