### **Minerals and Trace Elements Flashcards | Quizlet**

Trace mineral testing is usually performed on a blood sample obtained by inserting a needle into a vein in the arm. Sometimes a 24-hour urine collection is obtained. Special metal-free blood or acid-washed urine containers are used to minimize the potential for sample contamination by any outside sources of minerals.

### **Google Health - Google**

This essential mineral plays such an important role in so many functions in our body that you can't afford to be deficient in this. Take at least the U.S. Recommended Dietary Allowance (RDA) amount or eat foods high in zinc. Most multi-vitamins include enough of this mineral but topping up with a separate supplement may be a good idea for some people.
