Fractures, or broken bones, are a common injury in the United States and around the world. In fact, the average person in a developed country can expect to sustain two fractures during their lifetime. Nearly 7 million fractures are reported each year in the U.S., with wrists and hips the most affected areas. The vast majority of fractures need to be casted by a health professional to heal ...

Silk has always been a pretty valuable material, but in recent years it's gained attention from the scientific community as well. That's because it's an extraordinarily strong material when woven together like in bulletproof vests, but it seems silk can also be used for a variety of purposes inside our bodies too.
