The future is the time after the present. Its arrival is considered inevitable due to the existence of time and the laws of physics. Due to the apparent nature of reality and the unavoidability of the future, everything that currently exists and will exist can be categorized as either permanent, meaning that it will exist forever, or temporary, meaning that it will end.

This signposts document consists of two separate but closely related works: this timeline and perspectives on the future. The timeline offers a general outline of our possible future history, and is somewhat conservative and circumscribed in what it offers the reader. The timeline is meant to be the 'harder' (or more factual/credible) of the two works, in terms of science and predictions.

Technology is evolving us, says Amber Case, as we become a screen-staring, button-clicking new version of homo sapiens. We now rely on "external brains" (cell phones and computers) to communicate, remember, even live out secondary lives. But will these machines ultimately connect or conquer us? Case offers surprising insight into our cyborg selves.
