Futuyma: No, certainly not. There cannot be evolution without genetic variation in the first place. So there must be mutation and often recombination to generate the different genotypes or the different versions of the genes, known as alleles, which then may or may not make a difference in the ability of an organism to survive and reproduce.

The Birth of the Tie. If we go back four thousand years to ancient Egypt, we can examine the necks of many Pharaohs and notice broad ties adorned with precious stones wrapped around their necks. Archeologists have found what is believed to be a talisman known as the Knot of Isis around the necks of mummies. It is called that way because it resembles a knot used to secure the garments worn by ...
