Transactional Analysis Journal

Transactional analysis (TA) is a psychoanalytic theory and method of therapy wherein social transactions are analyzed to determine the ego state of the patient (whether parent-like, child-like, or adult-like) as a basis for understanding behavior. In transactional analysis, the patient is taught to alter the ego state as a way to solve emotional problems.

International Transactional Analysis Association - ITAA

Reviews and describes various concepts of ego states proposed by Eric Berne and other TA theorists. Suggests the four basic models of ego states to be the conceptual, the structural, the functional, and the second-order structural. Considers each in terms of specific content, inter-relations with other models, utility, and most appropriate application.
