Ten Steps to Successful Breastfeeding « web site + 10 step video series Babies who are breastfed are generally healthier and achieve optimal growth and development compared to those who are fed formula milk. If the vast majority of babies were exclusively fed breastmilk in their first six months of life – meaning only breastmilk and no other liquids or solids, not even water – it is ...

Breast Milk, Breastmilk, Breastfeeding, Breast Feeding ...

One small study showed that laughter increased levels of melatonin in breast milk in both mothers with atopic eczema and healthy mothers, and feeding infants with increased levels of melatonin-containing milk reduced allergic responses in infants.. Research suggests that babies who are not breastfed are less sensitive to social cues, and infant feeding has a similar effect on mothers.
