Steven Landsburg | The Big Questions: Tackling the ...

The Library of Economics and Liberty. The natural course of things cannot be entirely controlled by the impotent endeavours of man: the current is too rapid and too strong for him to stop it; and though the rules which direct it appear to have been established for the wisest and best purposes, they sometimes produce effects which shock all his natural sentiments.

Why in the world did I do that? How can I do better? Chances are you've asked yourself these questions at least once today. To understand how your mind works and how you can improve your decision-making, explore these six psychology and behavioral economics books, each one recommended by a TED Talks speaker.

Books to help you answer big questions about yourself

John R. Commons (1862–1945) also came from mid-Western America. Underlying his ideas, consolidated in *Institutional Economics* (1934) was the concept that the economy is a web of relationships between people with diverging interests. There are monopolies, large corporations, labour disputes and fluctuating business cycles.

Institutional economics - Wikipedia

Economics is a field of study that has become increasingly relevant in our globalized, financialized society. The economy is part of our collective conscious and a buzzword that links personal ...

Welcome to Mauldin Economics. Ever since his breakthrough book, *Bull's Eye Investing: Targeting Real Returns in a Smoke and Mirrors Market* (Wiley, 2004), best-selling author, analyst, and financial writer John Mauldin has been helping individual investors and institutions develop a clearer understanding of the forces driving the global economy and investment markets.

Mauldin Economics - Financial Newsletters, Economic ...

Neo-Keynesian economics is a school of macroeconomic thought that was developed in the post-war period from the writings of John Maynard Keynes. A group of economists (notably John Hicks, Franco Modigliani and Paul Samuelson), attempted to interpret and formalize Keynes' writings and to synthesize it with the neo-classical models of economics. Their work has become known as the neo-classical ...

Did you know that the game we all know as Monopoly was originally designed to teach Georgist economics? Elizabeth Magie Phillips first patented her Landlord's Game in 1904. It was identical in layout and rules to today's Monopoly-- with one big difference: players could vote to switch, and play the game by single tax rules! When they did that, no one ever lost!

Introduction to Georgist Philosophy and Activity

Economics Category - The Unz Review

Why big companies squander brilliant ideas. J F C Fuller did not invent the tank. That distinction should probably fall to E L de Mole, an Australian who approached the British war office in 1912 with a design that was — in the words of historians Kenneth Macksey and John Batchelor — “so convincingly similar to those which finally went into service that one wonders why it was never ...

Why big companies squander brilliant ideas - Tim Harford

I have just read some of the behavioural economics books you've chosen, and I found them almost impossible to put down. It's fascinating how people behave in these experimental situations – whether they're eating huge quantities of soup without realising it, or failing to see a gorilla.
