Bruce Harold Lipton (born October 21, 1944 at Mount Kisco, New York), is an American developmental biologist best known for promoting the idea that gene expression can be influenced (via epigenetics) by environmental factors i.e. people have a greater impact on their health than genetic research has previously determined. He is the author of the book, The Biology of Belief, and is a former ...

In one of the great ironies of the modern world, the science that was expected to solve life's mysteries has done just the opposite. New discoveries have called into serious question 150 years of scientific thinking, created deeper mysteries, led to more unanswered questions, and brought us to the brink of forbidden territory when it comes to explaining our origin and existence.

As you learn about limiting beliefs, the most important thing to remember is not to judge yourself for them. We make meanings from the world around us; those interpretations and perceptions are recorded by the subconscious mind and then become the beliefs or rules by which we live—often without us being aware we are doing so.

### **2 Highly Effective Techniques to Erase Your Limiting Beliefs**

Heredity is the passing on of traits from parents to their offspring, either through asexual reproduction or sexual reproduction, the offspring cells or organisms acquire the genetic information of their parents. Through heredity, variations between individuals can accumulate and cause species to evolve by natural selection. The study of heredity in biology is genetics
