The Transition Handbook From Oil

The terms transition town, transition initiative and transition model refer to grassroots community projects that aim to increase self-sufficiency to reduce the potential effects of peak oil, climate destruction, and economic instability. The "Transition Network", founded in 2006, inspired the creation of many of the projects. A number of the groups are officially registered with the Transition ...

The Shell Energy Transition (SET) Report sets out why we believe Shell will be resilient to expected changes in the energy system and how our strategy should allow Shell to thrive as the world transitions to lower-carbon energy. It responds to society's request for greater transparency on climate-related risks and, as such, is our principal response to recommendations of the Task Force for ...

Post-transition metals are a set of metallic elements in the periodic table located between the transition metals to their left, and the metalloids to their right. Depending on where these adjacent groups are judged to begin and end, there are at least five competing proposals for which elements to include: the three most common contain six, ten and thirteen elements, respectively (see image).

Overinvestment in oil and gas creates risks for investors, regardless of whether the world is effective in tackling climate change. Either investors face assets being stranded as demand for fossil fuels falls in a transition to a low carbon economy, or the overinvestment contributes to excess emissions from fossil fuels, the failure to transition and the financial costs of a dramatically ...
