You like social outings and spending time with your friends. So is this because you are genetically disposed to do so, or is it because of the environment you grew up in? And what is the reason for your fear of dogs? These are some of the things that form a part of the age-old nature vs. nurture debate, and we try to understand which of two factors affects our behavior more.

Molecular cloning refers to the process of making multiple molecules. Cloning is commonly used to amplify DNA fragments containing whole genes, but it can also be used to amplify any DNA sequence such as promoters, non-coding sequences and randomly fragmented DNA. It is used in a wide array of biological experiments and practical applications ranging from genetic fingerprinting to large scale ...

While most of them surpass this rough voyage with courage, there are others for whom these issues seem to be like the end of the world. For those with low self-esteem, getting rid of life seems much easier than a troublesome journey, as thoughts of being unwanted and constant depression lead them to take extreme steps like suicide.

DNA testing is the new trend and everyone seems to be peeking into what their DNA results uncover. Obviously, I am a proponent of genetic testing - when used correctly. When DNA testing is done improperly, people are finding inconsistencies. This leads to frustration, doubt, FDA crackdowns and a threat to future DNA testing. After months [...]
