Signs and symptoms. Individuals in a hypomanic state have a decreased need for sleep, are extremely gregarious and competitive, and have a great deal of energy. They are, otherwise, often fully functioning (unlike individuals suffering from a full manic episode).. Distinctive markers. Specifically, hypomania is distinguished from mania by the absence of psychotic symptoms and grandiosity, and ...

### **Hypomania - Wikipedia**

Hypomania and mania are periods of over-active and excited behaviour that have a significant impact on your day-to-day life. Hypomania is a milder version of mania that lasts for a short period (a few days) Mania is a more severe form that lasts for a longer period (a week or more) Some people find ...
