The Origin of Species and The Voyage of the 'Beagle ...

Origin Of Species. British naturalist Charles Darwin (1809-1882) began drafting Origin of Species in 1842, just six years after returning from his fateful five-year voyage aboard the HMS Beagle (1831-36). Heavily influenced by Sir Charles Lyell's Principles of Geology (1830-1833, a three volume work) and Thomas Malthus' An Essay on the Principle...

Charles Darwin The Origin of Species 1859

Charles Darwin - On the Origin of Species: England became quieter and more prosperous in the 1850s, and by mid-decade the professionals were taking over, instituting exams and establishing a meritocracy. The changing social composition of science—typified by the rise of the freethinking biologist Thomas Henry Huxley—promised a better reception for Darwin.

Charles Darwin - On the Origin of Species | Britannica.com

Charles Darwin. Darwin formulated his bold theory in private in 1837–39, after returning from a voyage around the world aboard HMS Beagle, but it was not until two decades later that he finally gave it full public expression in On the Origin of Species (1859), a book that has deeply influenced modern Western society and thought.
